PODS

A close-up photograph of an industrial machine, likely a coffee pod filling machine. In the upper left, a circular pressure gauge with a yellow face and black markings is visible, showing a reading around -20 mbar. Below it, a metal component is partially visible. To the right, a white cylindrical roller is part of the machinery. In the foreground, several brown, oval-shaped coffee pods are arranged on a white, perforated filter paper. The background is a blurred industrial setting.

QUALITY AND TRADITION OF COFFEE

FOR A SUSTAINABLE COFFEE BREAK.

The exclusive Mokador pod system is designed to offer a high quality Italian espresso with the application of technology that guarantees many advantages:

- A simple, easy to use system.
- Every cup is perfect - an espresso at home or in the office that tastes the same as in a café.
- No waste, minimum maintenance.

The machines of the Mokador pod system are designed to ensure:

- The proper adjustment of the water temperature.
- Dispensing pressure ensures perfect dispensing.
- Mokador pods are the perfect choice for those who respect the environment because they have ecological, biodegradable paper filters, completely recyclable.

Our pods are made of filter paper and can be disposed of entirely in the organic waste after use, verifying the environmental provisions of your municipality. A conscious choice in favor of the environment.

Our pods are available in the E.S.E. format (44 mm), the international standard format and in the Mokador format (38 mm).
